| | We c | elaim: |
|----------|--|--|
| þ | 1. | A method for treatment of skin comprising: |
| 12 W | Treat | ting a subsurface layer of skin with a source of energy sufficient to cause stimulation of |
| 3 | collagen remodeling, in conjunction with applying a wound healing composition to the skin to wound | |
| 4 | healing, thereby achieving improved collagenesis in the skin. | |
| | | |
| 1 | 2. | The method of Claim 1 wherein the energy is electromagnetic energy. |
| | | |
| 1 | 3. | The method of Claim 1 wherein the energy is mechanical energy, such as |
| 2 | microdermabrasion. | |
| Ü, | | |
| 1 | 4. | The method of Claim 1 wherein the wound healing promoting substance is a growth |
| | factor. | |
| E | | |
| | 5. | The method of Claim 1 wherein the wound healing promoting substance is H3 protein. |
| | | |
| | 6. | The method of Claim 5 wherein the treatment is repeated serially with more than one day |
| 2 | between any successive treatments. | |
| | | |
| 1 | 7. | A method for treatment of acne scars in skin, comprising: |
| 2 | Trea | ting subsurface and surface layers of the skin with a source of energy in order to stimulate |
| 3 | collagenesis in the skin without substantial injury to the epidermis, in conjunction with applying a wound | |
| 4 | healing promoter composition which enhances a healing response in the skin, thereby improving the | |
| 5 | appearance of the acne scars. | |

New Patent Application

Filing Date: August 21, 2001

Title: ENHANCED NONINVASIVE COLLAGEN REMODELING Serial No.:

Attorney Docket No.: CTC-401

8. A method for treatment of photodamaged skin, comprising: 1 Treating the skin with a source of energy which stimulates collagenesis without substantial injury 2 to the epidermis, in conjunction with applying a wound healing promoter composition to the skin which 3 enhances a healing response, thereby improving the appearance of the photodamaged skin. 4 A method for treatment of wrinkled skin, comprising: 9. Treating the skin with a source of energy which stimulates collagenesis without substantial injury to the epidermis, in conjunction with applying a wound healing promoter composition to the skin which enhances a healing response, thereby improving the appearance of the wrinkled skin. U U U 10. An system for treatment of skin, comprising: 2 a source of energy which is sufficient to stimulate collagenesis in the skin without substantial 3 injury to the epidermis; and a wound healing promoter composition which enhances a healing response in the skin to accelerate collagenesis therein, thereby resulting in improved appearance of skin. 11. A method for treatment of tissue comprising the following steps: 1 causing a subdermal wound using a source of electromagnetic energy; and 2 applying a growth factor to the tissue, such that collagenesis, repair and healing improvement of 3 tissue is accelerated. 4
